DETAILED ACTION

Response to Amendment

The present communication responds to the Amendment of 7/10/2009.

By this communication, claims 1, 5 and 8 was amended. The amendments did not add new matter. Claims 1-5 and 8-9 are pending. The rejection(s) are as stated.

Allowable Subject Matter

Claims 1-5 and 8-9 are allowable over the prior art of record

The following is an examiner's statement of reasons for allowance: Applicant's arguments, see pages 7-8, filed 7/10/2009, with respect to claims 1-5 and 8-9 have been fully considered and are persuasive. The rejections of claims 1-5 and 8-9 have been withdrawn.

The subject matter of the independent claim 1 could either not be found or was not suggested in the prior art of record. The prior art does not disclose or render obvious "said guide including a hard stop for said follower to define an end of said reset segment of said driver travel path, and said hard stop when abutted by said follower rotationally aligns said driver with said nut engaging segment of said travel path, wherein along said injecting section of said travel path, said guide comprises first and second surfaces that define a channel in which said follower is slidable, said surfaces during injecting serving as physical stops to prevent rotation of said nut driver by abutment by said follower until an injection is complete, wherein along said nut rotating segment of said travel path, said guide comprises third and fourth surfaces that define a

channel in which said follower is slidable, said third surface providing a distal barrier during nut rotating that prevents distal plunging of said driver by abutment by said follower until said follower passes from said nut engaging segment to said injecting section, thereby limiting misuse of the apparatus".

Response to Arguments

Applicant's arguments, see pages 7-8, filed 7/10/2009, with respect to the rejection(s) of claim(s) 1-5 and 8-9 under 112 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
